

Precision Trim Saws

The Precision Trim saw has teeth which are beveled on the face and the top. This improvement on the standard ATB design gives an extra fine cutting edge. The raker tooth cleans away any stray saw dust so the teeth cut with perfect smoothness. This is the smoothest cutting blade you will find! Use stabilizer to get a real fine cuts.

Chop Saws & Radial Arm Saws

These saws are designed similar to the General Purpose saw but with a negative hook angle to prevent grabbing. This saw provides excellent crosscuts on all materials. For cutting Non-Ferrous, check pages 00-00.
