

Truss & Component Saws

All of Populars' truss blades are manufactured with a thicker plate for smoother and straighter cuts every time. These blades come with standard tapered mounting holes to fit 5/16" bolt with 82 degree tapering, except TRDS1640 which has a 1/4" bolt. Size of mounting holes may vary on the open side due to the thickness of saw plates. All truss blades has 10 degree hook angle.
